Growatt warranty procedure

1. Warranty period

For the inverter you purchased, you receive a Growatt factory warranty valid for 5 years from the date of

installation and no more than five and a half years from the delivery date from Growatt New Energy

Technology Co., Ltd. Standard 5 years factory warranty can be extended to 10 years.

2. Major Failures

In the 5 years standard factory warranty period, customers are entitled to a replacement of the product

when inverters are faulty approved by Growatt.

However, Growatt has no responsibility for compensation for any other damage or loss such as

transportation and installation cost, call out engineering service fees, and the loss of PV system stop

generating energy, etc.

Customers are entitled to have the products repaired or replaced if the goods fail to be of acceptable

quality and the failure does not amount to a major failure (See below" Major Failures").

A 'major failure' occurs where:

a) the product acquired by the customer would not have been acquired by a reasonable consumer fully

acquainted with the nature and extent of the failure; or

b) the product departs in one or more significant respects from description or sample if supplied by

description or sample; or

c) the product is substantially unfit for a purpose for which products of the same kind are commonly

supplied and they cannot, easily and within a reasonable time, be remedied to make them fit for such a

purpose; or

d) the product is unfit for a disclosed purpose that was made known to Growatt or a person who made

any prior negotiations before the purchase was made and the cannot, easily and within a reasonable

time, be remedied to make the product fit for such a purpose; or

e) the product is not of acceptable quality because it is unsafe.

3. Warranty condition

rowatt

This warranty includes all defects of design, components and manufacturing. Excluded from warranty are damages due to:

• Breaking the product seal (opening the casing) without proper approval

Transport damage

Incorrect installation or commissioning; For example, incorrect DC or AC pole wiring / connection,

loose DC or AC pole wiring / connection, which lead to the damage of inverter.

Failure to observe the user manual, the installation guide, and the maintenance regulations

Unauthorized Modifications, changes, or attempted repairs

Incorrect use or inappropriate operation

• Insufficient ventilation of the device

• Failure to observe the applicable safety regulations

• Force majeure (e.g., lightning, over voltage, storm, fire)

4. Warranty claim

If a device becomes defective during the agreed Growatt factory warranty period and provided that it will not be impossible or unreasonable, the device will be, as selected by Growatt:

· repaired by Growatt, or

· repaired on-site, or

Growatt.

exchanged for a replacement device of equivalent value according to model and age.

In the latter case, the remainder of the warranty entitlement will be transferred to the replacement device. In this case, you do not receive a new certificate since your entitlement is documented at

Excessiveness in the meaning above exists in particular if the cost of the measures for Growatt would be unreasonable

• in view of the value that the device would have without the defect,

• taking into account the significance of the defect, and

after consideration of alternative workaround possibilities that Growatt customers could revert to

without significant inconvenience.

Growatt

Please note customers have full responsibility to fill in warranty claim forms before they send faulty

inverters back to Growatt. If customers don't fill in warranty claim form according to the following general

warranty procedure, Growatt has no responsibility for any returned inverter from these customers and

Growatt are entitled to refuses non-qualified claims.

Please read the below notes before fill in *Growatt Warranty Claim Form* 

The general warranty service procedure is:

a) Original customers (end user) can call our service hot line for general enquiry or inverter failure. Our

qualified engineer will guide them try to fix it, or confirm the fault.

b) Installers attend site. Installers can call our service hot line when inspecting & troubleshooting

inverter onsite. If possible, our qualified engineer will guide you try a quick fix onsite. Installers have

the right to replace it if problem doesn't fix onsite. However, if you had replaced inverters twice for

the site (the third inverter is on wall), please contact Growatt for further assistance, field service

engineers can attend site if necessary.

Further care for original customer also can be made if required, book on phone or via email.

c) Customers (Here customers include installer, distributor, or even end user) fully complete Growatt

Warranty Claim Form onsite before take faulty inverter off wall. Form with insufficient or incorrect

faulty descriptions will cause rejection, and delay of replacement release.

d) Customers send faulty inverters with Warranty Claim Form to our service center.

Note: if a replacement is required firstly, please just send the Growatt Warranty Claim Form to

us, we also can consider to send the replacement prior, in such cases we will inspect the unit

once it returned to Growatt.

e) Our qualified repair engineer will inspect & test returned inverters carefully. No fault description or

incorrect description will cause tremendous delays. No fault found inverters will return to the original

customer with test report.

f) Generally, we can release replacement inverters in 5 working days. However, we will notify customer

the delay of replacement release if inverters returned with insufficient or incorrect faulty descriptions.

g) Once the faulty inverter been replaced with a replacement inverter onsite, the "Replacement

Information" area on Growatt Warranty Claim Form is required to be filled in and return form to

Growatt.
